You can download free pdf Labview Core 2 Course Manual on the web..With two major, player-driven updates incoming to StarCraft II, the current state of race balance, and predictions of where things are going in the next three years, it is time to do a retrospective and take an in-depth look at the Race Balance update. Having delayed the Race Balance update by a few months, the implementation of the new balance update has been slow in coming. However, since the start of the year Blizzard has committed to improvements to the communication of this update, meaning that players will be able to better prepare for the update. With every balancing iteration of StarCraft II, our ability to do so increases as we learn more about the game and its behavior. The previous update to StarCraft II had a new set of races, the introduction of the Zerg and the Protoss. In the 2014 StarCraft II update, we then added the new minerals that the Xel'Naga upgrade caused and a number of new units. The most recent updates, since the release of Heart of the Swarm, has included new units, new maps, balance changes to units, and the introduction of a race-specific map for each of the four races. What follows is an article that attempts to explain and analyze the impact of the most recent changes to each of the races, with the intention of helping Blizzard and other players understand these changes and how they should respond. In general, we are looking at how the in-game and out-of-game balance mechanics will, and should, interact. You will be able to see how we have looked at different places on the scale from the "balanced" end of the spectrum to the "broken" end. In the comments, you will be able to share your thoughts on whether Blizzard was successful in their attempts to address balance in this iteration. To help with that, we have gathered some of
